## Uninterruptible Power System (UPS)

**Brightclick Solutions Sdn Bhd** would like to introduce **APC UPS solution** able to provide emergency backup power when the input power source or mains power fails. This also provides protection from power surges.

### Benefits of UPS:

- Continuity - Experience no outages to critical equipment like computers to factory production lines.
- Consistency - Eliminates glitches or surges and allows time to safely shut down main systems if and when needed.
- Protection - Safeguards against all the oddities of electricity such as surges, spikes, dips and failure.
- Filter - A line-interactive UPS acts as a kind of filter by refining the power as it comes into the UPS then adjusting its output.

### **Back-UPS Series**

Battery Backup & Surge Protector for Electronics and Computers

### **Back-UPS Pro Series**

High Performance Computer and Electronics UPS for Premium Power Protection

### **Smart-UPS Series**

Intelligent and efficient network power protection from entry level to scalable runtime. Ideal UPS for servers, point-of-sale, routers, switches, hubs and other network devices.

### **Smart-UPS On-Line Series**

High density, double-conversion on-line power protection with scalable runtime

### **Symmetra Series**

Highly available single phase UPS features redundant and scalable double-conversion on-line power protection

### **Symmetra VT Series**

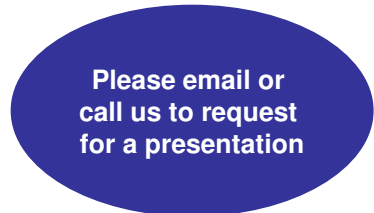

Effective 10-40kVA 3 phase UPS power protection against downtime and data loss for mission critical applications.

### **Symmetra PX Series**

10-500kVA -480V and 16-500kVA -400V high performance, right-sized, modular, scalable, 3 phase UPS power protection with ultra high availability and efficiency for any size data center or high density power zone.

### **Symmetra MW Series**

400 -1600kVA ultra energy efficient, modular, scalable, 3 phase UPS power protection with industry-leading performance for large data centers and mission-critical environments

**Brightclick Solutions Sdn Bhd** (Company no:780570-T)
